PROFESSIONAL SUMMARY

Full Stack Developer building responsive web applications across frontend, backend, databases, and deployment. Developed TechCart, an e-commerce platform with separate buyer and admin applications, 26 frontend routes, and 83 REST API endpoints. Hands-on experience with category-driven product data, MongoDB aggregation, authenticated API integration, and direct-to-storage image upload workflows.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, RTK Query, Context API

Backend & Databases: Node.js, Express.js, REST APIs, Zod, MongoDB, Mongoose, MongoDB Atlas

Tools & Deployment: Git, GitHub, Postman, Vercel, Render

Familiar With: Vitest, React Testing Library, MSW, Supertest, Docker, Docker Compose, GitHub Actions, CI/CD, Cloudflare R2

TECHNICAL PROJECTS

TechCart | Full-Stack E-Commerce Platform

Next.js, React.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, Redux Toolkit, RTK Query

- Built separate Buyer App and Admin Console covering 26 frontend routes and 83 REST API endpoints.
- Developed responsive buyer workflows for product discovery, category browsing, product details, filtering, sorting, and pagination.
- Built reusable admin interfaces for managing products, categories, brands, specifications, variants, and images.
- Integrated authenticated REST API queries and mutations with RTK Query, including caching, loading/error states, and server-state synchronization across both applications.

TECHCART - KEY TECHNICAL IMPLEMENTATIONS

Server-Side Product Search | MongoDB, Mongoose, TypeScript, REST API

Buyer App + Backend API

- Added a q parameter to the Get Products API and implemented case-insensitive, partial keyword matching against product names and descriptions.
- Used MongoDB \$facet to return paginated matches and the total result count in one aggregation query, avoiding full-catalog downloads for browser-side search.

Dynamic Category Filtering | TypeScript, Express.js, MongoDB Aggregation

Buyer App + Backend API

- Built GET /api/categories/:slug/filters to derive category-specific brands, price ranges, specification ranges, and variant axes from active product data.
- Used Mongoose and parallel database queries to generate filter configurations on the backend instead of maintaining hardcoded frontend filters.

Secure Cloudflare R2 Image Uploads | TypeScript, Express.js, Presigned URLs, RBAC

Admin Console + Backend API

- Implemented admin-only presigned upload APIs with MIME type validation and UUID-based object keys, enabling direct uploads without exposing storage credentials.
- Added upload tracking, single-use object-key validation, image-count checks, and primary-image normalization across product, brand, and category images.

Dynamic Category Specifications | Mongoose, MongoDB, TypeScript, REST API

Admin Console + Backend API

- Built PATCH /api/admin/categories/:id/specifications to support grouped, typed fields, enumerated options, units, required fields, and filterable attributes.
- Added validation for duplicate groups/fields, types, required values, and enums, plus reference-aware guards against deleting specifications already used by products.

ADDITIONAL PROJECT

MovieNest | Movie Discovery Application

- Built a mobile-first movie discovery interface using React.js, TypeScript, and Tailwind CSS for mobile, tablet, and desktop layouts.
- Created reusable React hooks for asynchronous TMDb API requests, including loading, error, and data-state handling.

PROFESSIONAL EXPERIENCE

Web Development Intern | Techvolt Software Company, Coimbatore

- Developed responsive web pages using HTML5 and CSS3, applying modern frontend and responsive design practices.
- Built clean, structured layouts and strengthened practical UI implementation and development workflow skills.

EDUCATION & CERTIFICATIONS

B.Sc. Botany | Bharathiyaar University, Coimbatore | 2021

Certified MERN Stack Developer | IDM TechPark, Coimbatore | February 2025

AI-Augmented Development: Build, Test & Deploy Apps | LearnzConnect | June 2026

LANGUAGES

Tamil, English
